

Tailored messaging for your Endo practice

Intiveo is a cloud-based patient communication software that provides automated and customizable appointment confirmations, recall reminders, booking requests, and reputation management - via text, email, voice.

Customizable procedure based messaging

Pre- and post-op instructions

Post-care check-in

Health screening forms

Automated review requests

Link to your educational videos

Intiveo for Endo is designed to empower your patients by providing specific information about their procedures. Intiveo works with your Endo practice to ensure patients are prepared.

- Implement a virtual waiting room
- Provide health screening questionnaires before appointments
- Improved online reviews will help the reputation of your practice
- Survey feedback will assist in your post-op care
- Choose what educational content your practice will provide for your patients
- Text back and forth with ease, right from your computer
