

Patient communication software for the entire patient journey

Intiveo is a cloud-based patient communication software that provides automated and customizable appointment confirmations, recall reminders, booking requests, reputation management, and more - via text, email, voice.

Enhancing patient communication for every touchpoint in the circle of care

- Automatically remind and confirm upcoming patient visits and send health screening surveys pre-appointment
- Implement a virtual waiting room to efficiently manage patient flow
- Get patients back with more effective automated recalls
- Easily send practice updates and fill appointment requests
- Follow up with patients post-appointment
- Solicit patient feedback and generate more patient reviews - Google/Facebook/Yelp

The Intiveo Difference
