

The Only Patient Communication Solution Built for Periodontal Practices.

At Intiveo, we understand that periodontal practices require a tailored patient communication tool. Intiveo Perio is designed to manage all of the intricate procedure- and treatment-based messaging sequences for periodontal practices. Automate appointment reminders and confirmations, pre- and post-appointment instructions, health questionnaires, and more - all with Intiveo Perio.

Many practices are already using Intiveo Perio! They have seen significant changes in their practices, such as:

Approximately \$50,000 reduction in operational costs

A significant reduction on manual patient confirmations, reminders, and follow-ups.

A significant reduction in the number of no-shows and failed appointments.

Perio is a specialty practice - so Intiveo
Perio is built with your specific, complex
communication needs in mind.

- Customizable messaging cadences, depending on the procedure or treatment
- Templates built with perio practices in mind
- Automatic appointment reminder and confirmations
- A 2-way chat that manages messages between patient and dentist, for both single and multiple locations
- An enablement and support team who are knowledgeable about periodontal practices
- Integration with many patient management tools
